Dear Catherine Martin and Shelley Davis,

Through Jennifer Levert, who is married to one of our general managers, we learned of the devastating toll this flood has taken on your community and in particular learned of the unfortunate circumstances that led to your elementary school having to give back the broadcasting equipment you borrowed from the local high school.

We looked into the previous schools' broadcasts on your website and it looks like the students have a lot of fun learning and sharing stories from the community together. Our company values the importance of community, learning and fun and wants to do a small part to help the students get their broadcasts back up and running.

Hevy, Toyo and Folsom pumps would like to donate \$1,000.00 towards the purchase of new technological equipment.

We are looking forward to seeing the lights camera and action in the near future.

Best wishes to you,

Justin Van-De-Velde
Chief Executive Officer
